Approved For Release 2002/06/18: CIA-RDP85-00988R000400080076-8

27 DEC 1977

	MEMORANDUM FOR:	Chief, Plans and Programs Staff, OL
STATINTL	FROM:	
,		Acting Chief, Logistics Services Division, OL
	SUBJECT:	New Communications Support Requirements for FY 1980-1984
	REFERENCE:	Multiple Adse Memo dtd 10 Nov 77 fr D/L; Same Subject (OL 7 5062)

- 1. In response to the referent, the following information is provided regarding future requirements for communications support for 1980 through 1984.
 - a. The possibility of installing a minicomputer and terminal is being explored with the Office of Data Processing for our Building Services Branch in Room GJ10 in the Headquarters Building. This project is an LSD MBO identified under LSD-01-78.
 - b. The prospect of obtaining additional space is poor at this time but there is a good possibility of acquiring space in the future if the moratorium on federal acquisition of leased property is lifted by GSA. At the present time, we have space requirements in the neighborhood of 85,000 square feet for which we would require a secure voice system similar to that installed in the of course, that the new pullding was located along
